

Cone bags

Pipe sealing without compromises

- › Flexible use in almost all pipe profiles
- › Easy handling due to low weight
- › Secure closure of all pipelines
- › Available in three sizes from 250–1,600 mm

With the Vetter Cone bags you have a strong helper with you that reliably seals and, thanks to its conical shape, adapts to almost all profile types of round, egg, mouth, corner and kite profiles. This allows you to seal all types of pipelines even in difficult installation situations, allowing you to concentrate on your work on site.

Due to its low weight and compact transport format, the foldable barrier bag can be quickly positioned in the manhole by means of a drawbar eye. That is where it convinces with its extremely durable CR material in familiar Vetter quality.

Once positioned, it can be emptied quickly and easily without moving the bag in the pipe using a vacuum adapter and suction cup. You do not need a separate compressed air bottle and benefit from uncompromising quality "Made in Germany".

Additional with an adapter for working with claw couplings

Technical data

Cone Bags	Pipe diameter	Length	Air requirement	Weight approx.
	<i>mm/inch</i>	<i>mm/inch</i>	<i>litre/cu. ft.</i>	<i>kg/lbs</i>
